RE: Used Oil Processor Biennial Report (2017)

To Whom It May Concern:

Jebro Incorporated is submitting a letter to meet the reporting provisions of 40 CFR 279.57(b) for calendar year 2017.

Jebro's EPA Identification Number: IAD020201604

Name & Address of Processor: Jebro Inc., 2303 Bridgeport Drive, Sioux City, IA 51111

Calendar Year Covered by This Report: 2017

Quantity of Used Oil Accepted For Processing In 2017: 3,002,667

Manner In Which used Oil Is Processed: When the used oil is received it is unloaded at a station where the used oil flows through a strainer basket on its way to a receiving tank. The used oil is then thermally processed in efforts to reduce the water content to a level that is suitable for Energy Recovery. Dehydration chemicals are never used. The used oil is then transferred to a finish tank where the used oil is tested by an independent laboratory to assure that the used oil meets EPA's on-specification standards. Once it is certified as on-specification, the used oil is used for Energy Recovery purposes.

If you have any questions or concerns please feel free to contact me at (712) 234-2828.

Sincerely,

Sheila V. Gerke
